 +Appointed December 21, 1925, in place of Charles E. Davis, resigned. Elected March 2, 1926.

Report of the Mayor

To the Citizens of Rutland:

Inasmuch as the reports of the heads of the various City Departments are most detailed and comprehensive and show exactly where and how the money of the City has been spent, I see no need of my going into an exhaustive discussion of these various reports.

There are, however, one or two items which I would like to call especially to the attention of the citizens of Rutland.

In the Highway Department, the expense for streets was \$74,856.51. This was \$3,660.38 less than was expended for streets in 1927, and at the same time included expenditures for flood damage replacement work for which the State will eventually entirely re-imburse the City.

No department of the City exceeded its appropriation for last year.

The indebtedness of the City was reduced \$29,045.43—this being outside of the School House Bond indebtedness.

Consideration should be given to the fact that the City Treasurer earned over \$9,000 on the money received from the sale of the School House Bonds pending the time that this money was required for building purposes. \$4,500 was received from interest and \$5,000 was saved on Temporary Loan Warrants.

The City finished the year with a current cash balance, December 31, 1928, of \$54,190.83 plus \$64,866.36 balance of School House Bond money not yet expended at that date.

I would like to express here an idea of mine in connection with the finances of the City. It may not appeal to some people, but it seems to me to be founded upon a sound business principle.

While the actual annual tax rate, in dollars and cents, which it may be necessary to levy to cover the expenses of the

City, is important to all of us, there is another phase of the matter that seems equally important to me.

We have a progressive, growing city, therefore I think we should assess a tax rate each year that will take care of the current requirements of that year, merely to keep up with progress and growth.

About one hundred houses were built in this city in 1928—and a number of other structures.

A city of this type and size, growing to this extent, requires additional road work, sewer work, sidewalks, water connections, lights and fire-alarm boxes each season. Moreover, each year brings a current expenditure for the proper upkeep and replacement of necessary buildings and equipment throughout the various departments.

Unless these necessary expenditures are taken care of each year as they accrue, there is likely to be a call sooner or later for a bond issue to take care of the accumulated requirements.

I do not believe that the City should issue any more bonds for some time to come, unless of course in case of some emergency, but should take care of legitimate increases in expense each year.

I wish to take this opportunity of thanking the Board of Aldermen and the heads of the various departments for their co-operation and conscientious work during my administration.

Respectfully submitted,

ARTHUR W. PERKINS,

Mayor.

Report of the City Treasurer

To the Honorable City Council:

Gentlemen:—I herewith present to you my report as City Treasurer for the fiscal year ending December 31, 1928:

RECEIPTS

Taxes received by City Treasurer	\$495,341 85

Report of Sinking Fund Commissioners

To the Honorable City Council:

Your Commissioners have the honor to report the following transactions and changes in the Sinking Fund for the year ending December 31, 1928, to which is appended a list of the securities and cash on hand, viz:

	Water	General	Total
Balance from last report	\$31,188 64	\$113,073 34	\$144,261 98
Income, Interest	1,090 81	3,954 62	5,045 43
City appropriation		12,000 00	12,000 00
	\$32,279 45	\$129,027 96	\$161,307 41

SECURITIES AND CASH

City of Rutland Bonds	\$20,000 00
U. S. Bonds	3,000 00
City of San Diego, Calif., 4½s	5,000 00
King County, Wash., 4½s	20,000 00
N. Y. Central R. R. Cons. 4s	26,000 00
Louisville & Nashville R. R. 4s	5,000 00
Rutland R. R. 4½s	11,000 00
Rutland-Canadian R. R. 4s	1,000 00
Baltimore & Ohio R. R. 4½s	5,000 00
Pacific Tel. & Tel. Co. 5s	10,000 00
Southern Bell Tel. Co. 5s	14,000 00
Ohio State Tel. Co. 5s	6,000 00
Amer. Tel. & Tel. Co. 5s	10,500 00

Report of Commissioner of Public Works

To the Honorable City Council:

Gentlemen:

In accordance with the provisions of the City Charter, I submit herewith the annual report of the Commissioner of Public Works for the year ending December 31, 1928.

ORGANIZATION

Commissioner of Public Works—R. H. Royce

City Engineer—R. H. Royce

Superintendent of Streets—R. H. Royce

Assistant City Engineer—E. L. Tracy

Assistant City Engineer—W. K. Nichols

Clerk—L. E. Hinckley

Superintendent of Water Works—E. S. Beardsley

General Superintendent—J. T. McLaughlin

Asst. General Superintendent and Mechanic—C. C. Colvin

STREET DEPARTMENT

South St., from Forest St. to Granger St., Granger St., from South St. to Park St., and Park St., from Granger St. to Main St. were paved with bituminous macadam. The crushed stone came from the City quarry on Pine Hill and two gallons of Standard Binder B asphalt were used per square yard. Street intersections were paved where crossed and a total of 11,275 square yards were placed at a total cost of \$16,002.87, or \$1.42 per square yard. This price includes grading and considerable new gravel sub grade.

The original intention was to pave Crescent Street from Grove Street to Church Street, also, but due to delays caused by rainy weather in the early summer this was not done.

Generally speaking the streets last fall were in unusually good condition, and an easy time was anticipated this spring. Unfortunately the flood soaked the ground with water, then a nearly snowless winter drove the frost in deep, and a sudden thaw in early April caused the worst road conditions, both here and throughout the state, that I know of.

Many cars were bogged down in streets that heretofore had not given any trouble, and the City Tractor operated steadily for four days and nights assisting mired automobilists.

The road conditions of this year were unusual and to put in proper pavements which would prevent a recurrence under similar conditions would probably cost over a million dollars for paving alone.

A new portable gravel crusher was bought and put in the gravel pit.

A total of approximately 12,284 cubic yards of crushed gravel was spread on various streets during the year. This gravel being crushed was much better than that used in previous years. While funds did not permit of doing the amount of preliminary grading desirable, what could be was done.

The two Mack Trucks gave good service this year. The hubometer on Mack No. 2 was out of service part of the year but ran about the same distance as Mack No. 1, which covered 10,783.7 miles, and consumed 4,965 gallons of gasoline doing so. The hubometer on Mack No. 1 on December 31, 1928, showed a total mileage of 17,745.6 miles.

A small power shovel was bought this year and has done a great deal of work that could not have been done otherwise. It is however in my opinion too light for the work required.

A new tractor was bought late in the year as the old one required extensive repairs and it did not seem economical to make them.

Streets were sprinkled with water in the business district, and with oil or calcium chloride in the residential districts. Grove Street from Library Avenue to '76 Bridge was given a

surface treatment with Tarvia, which so far has given good results.

Cold patching of holes was done as fast as could be with one gang operating, but holes developed faster than they could be filled. During the major part of the year the old G. M. C. 5-ton truck was used for this purpose, but because of its bulk and cost of operation it was thought more economical to buy a light truck; and a second-hand Chevrolet was purchased for this purpose.

Concrete curbs were built on a half-cost basis with property owners as follows:—

On West Street and Court Square 739 lin. ft. of curbing 6-in. top, 8-in. bottom, 22 in. deep were poured.

On Grove Street from Vernon Street southerly 1080 lin. ft. of the same dimensions were poured.

Snow removal costs were light this year, the greatest part of it being sanding icy streets. Keeping gutters open in the business district greatly facilitated ice removal in the spring.

Considerable work was necessitated by flood repairs which were not completed in 1927 and the Street Department received from the State \$4,348.60 in payment of this.

A new Ford Coupe was purchased this year, and the cost pro-rated among the various accounts in the Department of Public Works.

Birchwood Avenue and Wallace Avenue were accepted as new highways this year following the construction by the owner of the abutting property of sidewalks and rough grading. In this connection the owners, Wallace Nichols and Lavonia Fish, gave a right of way to the City over the sewer which was built some years ago across their lands.

SEWER DEPARTMENT

(1) Woodstock Ave. In 1927 the builder of the house just east of Tremont St. laid 90 ft. of 10-in. pipe along the north gutter from a manhole built over the Tremont St. sewer

(see 1927 report). He abandoned the work and in 1928 the City finished it. A manhole was built over the 1927 sewer 80 ft. east of the Tremont St. manhole and from here, in 21 ft. of 10-in. pipe, the sewer line was offset 12 ft. to the north in order to avoid the water main. At this point a manhole was built and from here 97 feet of 10-in. pipe was laid easterly to the end in front of the new house.

(2) Edgerton St. Beginning at a new manhole built over the 12-inch trunk sewer at a point 10 ft. west of the stone wall that marks the east end of Edgerton St., thence westerly 132 ft. of 10-in. pipe, thence further westerly 218 ft. of 8-in. pipe to the end about in front of No. 72 Edgerton Street. This sewer is on the approximate centerline.

(3) Stratton Road. Beginning at the brook outfall just south of No. 24 Stratton Road the pipe is laid as follows near the west edge of the traveled way: 20 ft. of 18-in. pipe to a manhole, thence 300 ft. of 15-in. pipe to a manhole, thence 250 ft. of 12-in. pipe to a manhole, thence 189 ft. of 12-in. pipe to a manhole on the centerline of Freeman Avenue, thence 111 ft. of 10-in. pipe to a manhole, thence 189 ft. of 10-in. pipe to a manhole, all in a southerly direction, thence 25 ft. of 10-in. pipe crossing the road southeasterly to a manhole in the east gutter, thence 124 ft. of 10-in. pipe southerly along the east gutter to the end and a manhole in the center of Allen St. traveled way and 30 ft. north of the stone wall on the south side of Allen St.

(4) Merrill St. Beginning at a new manhole built over the Ives Avenue sewer on the centerline of Merrill St., thence 244 ft. of 10-in. pipe easterly to the centerline of Litchfield Ave. The sewer is on the street centerline.

(5) Elm St. A new manhole was built over an angle point in the old sewer near Williams St. south line, thence 200 ft. of 8-in. pipe was laid northerly to a manhole, thence 12 ft. of 8-in. pipe to the end. This sewer is approximately 17 ft. west of the east line of Elm St. and parallel to it.

(6) Evergreen Ave. From the existing manhole in front of No. 59-61 Evergreen Ave. the 8-in. sewer was extended northerly 50 ft. on the same line as the old sewer south of the manhole.

(7) Chaplin Ave. Beginning at the east end of the existing 8-in. sewer just west of 17 Chaplin Ave., thence 148 ft. of 8-in. pipe to the end about 30 ft. west of the railroad right of way. The sewer is in the north gutter of the street.

(8) Grove St. The new sewer starts at the existing manhole on Vernon St. centerline, thence 300 feet of 10-in. pipe southerly to a manhole about in front of 226 Grove St., thence 150 ft. of 8-in. pipe southerly to the end. The line of the sewer coincides with a straight line between the manhole at Vernon St. and the manhole at Locust St.

(9) Leonard St. Beginning at the end of the 10-in. pipe as laid on Thrall Ave., in 1927, thence northerly 10 ft. of 10-in. pipe to a manhole, thence westerly 250 ft. of 8-in. pipe along the centerline of Leonard St. to the end.

(10) No. Church St. Beginning at the existing manhole on North St. a line of 8-in. pipe was laid northeasterly to a point on the north line of North St. and 3 ft. easterly of No. Church St. centerline, and thence continued on northerly to a manhole, 206 ft. in all, thence 100 ft. of 8-in. pipe to the end in front of the Gouchoe house and 3 ft. east of the centerline of the street.

(11) Post St. Beginning at a new manhole built on the intersection of the existing 8-in. South St. sewer with the centerline of Post St., the pipe is as follows: 300 ft. of 12-in. pipe northerly to a manhole nearly in front of 129 Post St., thence 300 ft. of 10-in. pipe northerly to the end in front of 116. The sewer is on the street centerline.

(12) Norton Place. Beginning at the east end of the 10-in. sewer as laid by J. Norton in 1924, thence easterly 120 ft. of 10-in. pipe to the end about in front of lot 9. Sewer is about on the centerline.

(13) Birchwood Ave. Beginning 66 ft. west of the 12-in. trunk sewer in Wallace Ave., at the end of the 66 ft. of 10-in. pipe laid on Birchwood Ave. in 1927, thence 202 ft. of 8-in. pipe westerly to a manhole, thence 150 ft. of 8-in. pipe further westerly to the end. This sewer is on the centerline of the street.

(14) Lafayette St. A new manhole was built over the end of the existing 8-in. sewer in front of 62 Lafayette St., and from there 108 ft. of 10-in. pipe was laid northerly to a manhole, thence 232 ft. of 10-in. pipe northerly to a manhole on the centerline of E. Center St., thence 68 ft. of 8-in. pipe northerly to the end. Sewer is about on the centerline of the street.

(15) Vernon and No. Main Sts. Beginning at the end of the 12-in. pipe in Vernon St. where 1927 construction stopped, thence easterly 118 ft. of 12-in. pipe along Vernon St. centerline to a manhole in Main St., thence northerly 232 ft. of 12-in. pipe to a manhole, thence northerly 300 ft. of 10-in. pipe to a manhole, thence northerly 42 ft. of 10-in. pipe to the end in front of the new Houston house. The No. Main St. sewer is parallel to and 30 ft. east of the west line of the street and is 5 ft. west of the west edge of the concrete pavement at the north end of the sewer.

(16) New High School (Private). Beginning at the 24-in. trunk sewer in Library Ave., thence northerly 20 ft. of 10-in. pipe to a manhole, thence northerly 250 ft. of 10-in. pipe to a manhole, thence easterly 22 ft. of 10-in. pipe to the end just north of the northwest corner of the new High School building. A catchbasin was built on the north side of this end of the sewer to drain the parking and driveway area on the north side of the building. This was built for the School Department and the Sewer Department will be reimbursed for the total cost.

(17) Harrington Ave. Beginning at a new manhole at the angle in the Ross St.-Harrington Ave. sewer about on Ross St. centerline, thence westerly 196 ft. of 8-in. pipe to the point where work was progressing December 31, 1928. From here the work will continue in 1929.

(18) No. Main St. Beginning at a new manhole over the end of the 8-in. sewer on the east side of No. Main St., north of Melrose Ave., thence northerly with 98 ft. of 15-in. pipe to the point where work was progressing December 31, 1928. From here the work will continue north to North St. and thence east to Bellevue Ave.

For all sewer work during the year 1928 Akron vitrified shale pipe was used.

SIDEWALK DEPARTMENT

In the Sidewalk Department all walks were built on a fifty-fifty basis with the property owners, and 41,395 square feet of cement concrete walks were laid. This is equivalent to 1.568 miles of 5-foot walk, and consisted of 22 different jobs, varying from 262½ square feet to 5,500 square feet per job.

Work started late, June 21st, due to a backward spring and continued to November 13th.

The work this year was financed by the last of a bond issue giving \$5,000.00 each year for this purpose.

GENERAL DEPARTMENT

As a result of the flood, considerable work on bridges and culverts was done this year.

A reinforced concrete flat slab bridge was built over Tenney Brook on North Main St., and on Adams St., and the stone culvert on Lincoln Ave., which was undercut and cracked, was given a new foundation and floor and gunited its entire length.

Door and Ripley bridges were let by contract by the State Highway Department to the Saunders Engineering Company. The contract called for completion of these bridges by October 2nd, 1928, but due to quicksand encountered at Dorr Bridge east abutment and delay in steel shipments, Dorr Bridge was not opened to traffic until the last of December, 1928, and Ripley the first part of January, 1929. The State kept an inspector-engineer on the job and supervised and financed the work.

The State in addition to paying for Dorr and Ripley Bridges, which cost approximately \$77,000.00, also paid this Department \$10,596.66 for flood repairs done by the City.

Dorr and Ripley Bridges will be painted in the spring and the approaches finished.

Due to various delays the work of removing the embankment at the old reservoir was not completed.

The marble wall in front of the Crestwood Hotel on the north side of Library Ave., was moved northerly 30 feet, and a number of trees were removed there and in front of the new High School.

A new flat slab reinforced concrete bridge was built over Moon Brook on Stratton road, to replace a rickety wooden one.

A new fence was set along the side of the old cemetery on North Main Street.

Considerable cleaning out of brooks and creeks filled with flood debris was done.

The parks and dumps were taken care of the same as last year.

A heavy anchor was placed on the old timber Billings Bridge, and paid for one-half by the town and one-half by the City. If this bridge is carried out by another flood, the anchor will enable the town to salvage the lumber and will prevent it from doing damage to the new Dorr Bridge.

WATER DEPARTMENT

Eleven new hydrants were completed this year and one other at the corner of Field Ave. and Grove St. was nearly finished.

Five hydrants were reset or replaced.

More time than usual was required this year to flush hydrants because of the accumulation of sediment in the pipes caused by the flood.

A rigid inspection of all hydrants in cold weather to prevent their freezing up was maintained.

Except for one short extension, all the new mains laid this year were 6-in. or larger in diameter, and 7,510 feet of new mains were laid. This is 2,504½ feet more than last year.

In 1926 there were 38 new services laid.

In 1927 there were 76 new services laid.

In 1928 there were 103 new services laid.

This is a good barometer of building operations.

The routine work of repairing leaks, shutting off and turning on the water, reading meters, etc., was carried on as usual.

One bad leak on the 16-in. supply main gave a few hours' trouble before it was repaired.

More work than usual was done in the vicinity of the reservoirs, because of conditions caused by the flood.

A new dam was built across Mendon Brook to throw the supply over to the intake, the chlorination house was rebuilt, the intake channel cleaned out and repaired, a new road and three new bridges were necessary, and the cleaning out of the flood-borne debris in the three reservoirs was finished.

The bulk of the material was removed quickly and economically by using a large gasoline drag line belonging to the Saunders Engineering Company who were employed to repair Glen Dam. In the large reservoir, after this material was taken out, there remained a deposit of glue-like mud varying in depth from 6 feet to 2 feet.

The Fire Department kindly placed a pumper at our disposal and by using high pressure fire streams we were able to flush out the mud in a few days, which would have taken weeks of work to remove by hand. The reservoir is now cleaner than it has been since it was built.

Forty thousand red pine transplants were purchased from the State Forestry Service and 39,000 were set out on pasture land in the vicinity of Wheelerville. One thousand were set out by the Forestry Club of Longfellow school under the supervision of Miss Hoyt and William Sargent of the Junior High School, and E. E. Bergstrom, Director of the 4-H Clubs in

Rutland County. These latter were set out on the reservoir lands and marked by a sign furnished by the boys.

A contract was let November 1, 1927, to Willis and Wands to cut ash and other timber on the so-called "Fyles Place," a part of the Wheeler property, purchased by the City. Their operations were considerably hampered by the flood.

Up to January 1, 1929, they had cut, removed and paid for 129,113 board feet of mixed birch, beech, basswood, maple, black cherry, spruce, pine, poplar, etc., and 94,921 board feet of ash.

They had placed by the road and had been paid for 203.94 cords of wood.

The cord wood not sold at the roadside is hauled to the City Poor Farm, where the Overseer of the Poor uses what he needs and the rest will be sold from there. Giving the cord wood a value equal to what we paid for it, the lumbering operations for 1928 show a net profit of \$2,968.75.

The measurement of the wood is under the immediate supervision of the caretaker of the Wheelerville property, who also patrols and polices the brooks, cuts the hay, takes weir readings, etc.

Some apprehension was felt when work was started on the road through the Mendon woods, but the contractors installed chemical toilets and co-operated with this department to prevent pollution of the stream.

The following three tables show the annual precipitation in the City of Rutland, the weir readings on the Wheelerville Brook just above the so-called "Temple Place," and the results of the water analysis.

TABULATION OF ANNUAL PRECIPITATION, RUTLAND CITY,
RECORDED BY GEO. H. ROSS, CO-OPERATIVE OBSERVER,
WEATHER BUREAU, U. S. DEPARTMENT OF AGRICULTURE

Month	Snow	Rain	Total
January	4.70 inches	1.42 inches	2.31 inches
February	5.20 inches	1.58 inches	2.20 inches
March	15.50 inches	.78 inches	1.99 inches

April	2.20 inches	2.88 inches	2.90 inches

Samples, containing one gallon each, were taken at points along the Mendon Reservoir and Gleason Reservoir supply mains and at a city tap, by the Superintendent of Water. These were collected in March and again in November and sent to the State Board of Health for the purpose of making a complete chemical analysis. The general report on all these was, "Sewage bacteria absent; a wholesome water." The detailed record of the chemical analysis can be seen at the City Engineer's Office.

REPORT OF ENGINEERING DEPARTMENT

The surveys of Dorr Bridge vicinity and of Ripley Bridge vicinity that were in progress at the close of 1927 were completed, the plans were drawn and then forwarded to the State Highway Department at Montpelier, where the bridges were

designed. At the same time that Ripley Bridge site was surveyed a complete detailed survey of Ripley Road, between West Street and Otter Creek, was made and the street lines were reestablished by the Board of Highway Commissioners. This was done because the description on file in the City Clerk's Office did not fit the existing conditions. The lines as shown on the 1928 plan were accepted by the Vermont Marble Company.

All of the 1928 construction was preceded by the proper surveys. Plans for the macadam roadway on South, Granger and Park Streets were drawn up and at the same time, as, no maps existed for South or Granger Streets, a detailed survey was made to locate all houses, fences, sidewalks, and other features. The maps of these are now on file.

A survey was made, plans were drawn up and grade stakes were set on Crescent Street between Church and Grove Streets. This street is proposed for macadam roadway in the near future. Similarly, Library Avenue between Church and Grove Streets was surveyed in anticipation of 1929 paving. A detailed map showing houses, new north line of street, and other details was made. The layout of proposed pavement, curbs and walks was worked out and the grades were established. The Edgerton Street development east of Lafayette Street was carried on in conformity with the plan and grades established by this department. A large number of streets were graded and worked preparatory to winter gravelling. This year these roadways were centered in the highways, just as for more expensive and permanent paving, according to the lines given by this department.

Preliminary to all sewer work surveys were made to establish line and grade of the pipe. All sewers were installed to conform as nearly as possible to the "Proposed Sewer System" as worked out in 1925, and at the same time meet and make use of existing sewers. A topographic survey was made of the land bordering Paint Mine Brook from Stratton Road to Moon Brook, to study the possible sewer routes from Stratton Road sewer to Moon Brook trunk sewer.

All sidewalk work was preceded by surveys to establish the walks either exactly on the street line or parallel to it, and to establish the grade so that no matter how short the walk built happens to be, it can be extended in the future. Short sidewalk jobs are nearly as expensive to survey as an entire block would be.

The lines and grades for the concrete curbs built on West Street, Court Square and Grove Street were worked out by this department.

The bridges built by the General Department were designed by the Engineering Department. The Adams Street and No. Main Street concrete bridges were spoken of in the 1927 report. These bridges were completed in 1928. A bridge over Moon Brook on Stratton Road was also designed and built. All three of these bridges are the same type: flat slab deck bridges with concrete siderails. After the flood damage at the Lincoln Avenue culvert was repaired the proper roadway fill over it was designed to conform to the original plans made before the culvert was built a good many years ago, but which were never completely carried out. This fill is now finished.

In 1927 a detailed survey was made of Stratton Road and in 1928 the plan was drawn up, and the street lines were reestablished from Woodstock Avenue to Allen Street. A plan was also made of North Street between No. Main and Bellevue Ave. The Creek Road was surveyed from the south line of the City to Ripley Bridge. A plan of this will be drawn up and the highway lines reestablished in 1929. The same fault made this procedure necessary for the Creek Road as for the Ripley Road already spoken of.

A topographic survey was made at the gravel pit on the Ripley Lot owned by the Vermont Marble Company when the Street Department started taking gravel from it in January. A survey was made of East Creek from State Street to West Street.

A survey and plan were made of the Willis Ross lot on Deer Street at northwest corner of Woodstock Avenue and

turned over to the City Attorney for him to use in connection with an investigation he was conducting.

The street lines of that portion of Prospect Street, between Madison Street and Strongs Avenue, were reestablished by A. C. Grover. The plan was accepted by the Board of Highway Commissioners and filed in this Office.

A tracing was made of an aerial map of East Creek and Mendon Brook owned by the Vermont Hydro-Electric Co. This may be very valuable in the future as it includes some of the Water Department lands in Mendon.

A survey was made at the corner of Main and Terrill Streets and a plan drawn up which will be used in deciding on proposed improvements.

At the water intake on Mendon Brook a new diversion dam was built. This was designed by this department. A detailed survey of the vicinity was made to show the changes resulting from the 1927 flood. A new card index of the water curb boxes was made and brought up to date.

The notes and plans of G. Ross, former City Engineer, were turned over to this department and the work of sorting and indexing this material is partly completed.

The street oiling was supervised by this department, as were the computing of costs and adjustment of property owners' claims.

The inventory of all property under the control of the Commissioner of Public Works was made by this department.

Street lines and grades were staked out in all cases where the property owner requested.

Plans were made of all sewers and water pipes laid during the year. These are in the form of yearly report sheets for each department.

DETAILS OF SEWERS CONSTRUCTED

Location	Size	Length	M. H.	Remarks
Birchwood Avenue	8"	352'	2	Fair digging, some rocks.
Chaplin Avenue	8"	148'		Good digging, ledge E. of end of sewer.
Edgerton Street (1 job)	8" 10"	218' 132'	1	Cold weather, 13' cut at one point, required sheathing.
Elm Street	8"	212'	2	Ledge excavation.
Evergreen Avenue	8"	50'		Fair digging.
Grove Street (1 job)	8" 10"	150' 300'	1	Ledge excavation for 125', hard digging rest of way, stony.
Harrington Avenue (Incomplete)	8"	196'	1	Hard digging, 6" to 10" frost.
High School, New Library Ave.	10"	292'	2	14' cut at trunk sewer in Library Ave. Required sheathing at 10' cut near N. W. cor. bldg.
Lafayette St. (1 job)	8" 10"	68' 340'	3	Ledge excavation entire length of job.
Leonard St. (1 job)	8" 10"	250' 10'	1	Easy digging
Merrill St.	10"	244'	1	Easy digging, a little ledge excavation at Ives Avenue
N. Church St.	8"	306'	1	Ledge excavation for about three-quarters of the job
N. Main St. (1 job)	10" 12"	342' 232'	3	Good digging most of job, hard digging in pavement shoulder at N. end of job
N. Main St. (Incomplete)	15"	98'	1	Ledge excavation
Norton Place	10"	120'		Fair digging, ledge E. of end of sewer
Post St. (1 job)	10" 12"	300' 300'	2	Hard digging, very stony
Stratton Road (1 job)	10" 12" 15" 18"	449' 439' 300' 20'	8	Cold weather, frost varied from 6" to 2' 6", used fires, considerable sheathing, water bothered during thaws, last part of job.
Vernon Street	12"	118'		Fair digging
Woodstock Avenue	10"	118'	2	Rather hard digging, some large boulders
Amount of 8" Akron pipe laid.....1,950 feet				
Amount of 10" Akron pipe laid.....2,648 feet				
Amount of 12" Akron pipe laid.....1,088 feet				
Amount of 15" Akron pipe laid.....398 feet				
Amount of 18" Akron pipe laid.....20 feet				
Total sewer laid.....6,104 feet or 1.156 miles

General	18,368 20
Water	51,388 64
	<u>\$179,980 09</u>

The following recommendations are submitted for your consideration:

That gravelling and grading the less-used streets be kept up; that a certain amount of hard-surface road be built each year; that oiling streets be done by funds appropriated for that purpose and assessments be done away with; that a motor driven street flusher and cleaner be purchased; that a new roller be purchased; and that no extensive pavement program be considered until sewer and water mains are put in proper condition.

That as soon as the bonded indebtedness permits serious consideration be given to devising ways and means to remedy glaring defects in our sewer system. Some of our trunk lines are most inadequate and the longer they go the more expensive it will become to correct the faults. The City is faced with a real need to spend upwards of a million dollars on its sewers in the near future.

That no more petitions for sidewalks be accepted unless for 300 consecutive feet or to connect existing cement concrete walks, or to complete a block.

That the policy of building not less than two concrete bridges each year to replace wooden structures be continued; that plans be made to replace West Street Bridge over East Creek with a modern steel structure in the near future; and that a committee be appointed to consider a pension system and group insurance for City employees.

That a certain amount of the revenue derived from the sale of water be set aside each year for a sinking fund to meet future replacements or emergencies.

That the meter and service charges for the sale of water be raised sufficiently to provide such sinking fund without hampering the carrying out of the proper amount of work. Our rates are low compared with other places, and the charge has not kept abreast with the increased cost of labor and material.

That the several small pieces of land which project into the Wheelerville property be purchased at a reasonable price and the land thus squared up and boundary disputes be obviated.

That the policy of constructing mains in accordance with fire insurance protection be kept up.

CONCLUSION

The State Highway Department has been of material and financial assistance in replacing flood damage and the total of what they have spent for the City is approximately \$92,000.

In concluding, I wish to express my appreciation of the loyal support I have had from the members of this Department, of the courtesy shown by other Departments and for the consideration and co-operation shown by the members of the Board of Aldermen and by His Honor the Mayor, Arthur W. Perkins.

Respectfully submitted,

R. H. ROYCE,

Commissioner of Public Works.

Report of Commissioner of Public Safety

To the Honorable City Council:

Rutland, Vt.

Gentlemen:

I hereby submit my report as Commissioner of Public Safety for the year ending December 31, 1928.

POLICE DEPARTMENT

The Police Department is composed of the Chief of Police, twelve patrolmen, and fifty one special officers.

313 arrests for various causes were made during the year, 15 less than in 1927, 183 were for intoxication, 33 for violations of Automobile Laws, 28 for Breach of Peace, 6 for Burglary in the night time, 20 Grand Larceny cases, and the balance for various other offences.

880 lodgings were applied for and given, this being an increase of 274 over the year previous.

25 Automobiles were reported stolen during the year, 24 of which were recovered.

111 places of business were found unlocked by officers and owners notified.

The Patrol Wagon answered 173 calls in which arrests were made, and covered 8,741 miles at a cost of \$183.37 to operate and \$142.44 being paid out for repairs and parts. \$175.75 was turned in to the City Court account, that was collected in costs.

During the month of September automatic traffic lights were installed at the corner of Washington and Wales and at the corner of Center and Wales at an approximate cost of \$600. During the early part of November some person, unknown, ran into and demolished the traffic light at the corner of Merchants Row and West Street. This light was replaced and paid for out of the 1928 appropriation.

RECOMMENDATIONS—Owing to the continual increase in automobile traffic, this department is greatly handicapped by not having a motorcycle to use in handling same, and I recommend this matter be taken care of at the earliest opportunity. An inventory of apparatus and equipment, etc., on hand shows a total of \$7,151.63.

Appropriation for 1928	\$26,700 00
Expenditures for 1928:	
Salaries	\$24,163 05
Expenses	1,939 68
Total	<u>\$26,102 73</u>
	\$597 27
Credits	<u>285 55</u>
Balance of appropriation void	\$882 82

Respectfully submitted,

JOHN C. FOX,

Commissioner of Public Safety.

FIRE DEPARTMENT

The Fire Department consists of one Chief Engineer, one Assistant Chief, two Captains, eleven regular men and ten call men.

The Chief, two Captains and eight men are at station one and the Assistant Chief and three men are at station two.

During the year the Department answered 233 alarms and assisted in giving artificial resuscitation at two drowning accidents. The alarms were as follows: Telephone, 169; bell, 50; still, 10; automatic thermostat, 4.

The total value of buildings and contents endangered was \$2,182,102.00. Total insurance carried was \$1,682,650.00 and total insurance paid was \$36,112.39 and a loss of \$3,700.00 not insured, making the total loss for the year \$39,812.39.

During the month of January, 1928, Deputy State Fire Marshal Preble and inspectors Paine and Lanthier and Chief Koltonski made an inspection of every business block, school, theater, church and public hall and stated that Rutland was the cleanest City in the State as to fire hazards. This record is made possible by the regular weekly inspections made by members of the Fire Department and is a big asset in the prevention of fires.

The inventory value of equipment and supplies on hand is \$65,889.20.

Appropriation for 1928	\$35,000 00
Received for wiring permits	<u>139 00</u>
Total	\$35,139 00
Expenses of Fire Dept., 1928	<u>34,735 72</u>
Balance of appropriation void	\$403 28

During the year new wire was placed on Forest Street from Union Street to River Street and on Granger Street from Plain to Park Street, along Park Street to South Main Street. Also on Strongs Ave., from City Hall to Clover Street. On October first and second every fire alarm box in the City was tested and all worked properly.

RECOMMENDATIONS:

As the City has grown steadily the past years there are several places where fire alarm boxes are needed and I would recommend that the fire alarm system be spread out to meet these conditions and that two boxes be installed each year until this condition is overcome.

The personnel of the Fire Department should be increased by two men and, as previously stated when I personally appeared before your Honorable Board, I feel these appointments should be made at once as there are two hours every day that one piece of fire apparatus is tied up and in case of fire must remain in the station for lack of men to get it out. This ap-

pears to be entirely wrong. In other words the City has spent several thousand dollars for fire apparatus that must stand on the station floor for lack of man power to move it in case of fire.

Respectfully submitted,

JOHN C. FOX,

Commissioner of Public Safety.

ALFRED H. KOLTONSKI,
Chief Engineer.

Report of City Attorney

To the Honorable City Council:

I herewith submit my report as City Attorney for the year ending December 31, 1928:

The duties of this office during the past year have been mostly of a routine nature, such as co-operating with and advising the various Departments of the City government, and the drafting of deeds, contracts, agreements, etc., for them. There were no suits brought during the year of 1928 either for or against the City, a number of minor claims against the City having been settled without suit. Two prosecutions were brought for violations of City ordinances.

During the year several insane paupers have been removed to the Brattleboro Retreat through the efforts of the Overseer of the Poor and the City Attorney, and the City relieved from further liability for their support and care. I have attended several hearings before the Public Service Commission in the matter of bus line petitions. It has been a pleasure for me during the past year, to advise the City officials, members of the Board of Aldermen and various committees of the same.

Respectfully submitted,

J. A. CROWLEY,
City Attorney.

Report of Overseer of Poor

To the Honorable City Council:

I herewith submit my report as Overseer of the Poor for the year ending December 31, 1928:

Appropriation	\$10,000 00

COMMITTED TO STATE INSTITUTIONS

Name and Date	Institution
Arthur Jackson, February 28, 1928	Waterbury
Harry Allen, July 12, 1928	Waterbury
Theron Ellis, August 27, 1928	Brandon, Vt., Feeble-minded
Anna Emerson, September 29, 1928	Waterbury

I respectfully call to your attention the fact that during the past year assistance was given to 129 outside poor, an increase of over 100% in the number of families assisted in previous years. The total cost of this assistance was \$7,834.46 or \$60.73 per capita, a slight decrease per capita over the cost in previous years. The average number of inmates at the farm during the past year was twenty-eight a gain of about 100% over the average for previous years. The average cost per capita for the inmates was \$116.44 not including the feeding of 478 transients, supper and breakfast. A number of improvements were made at the farm during the year, including the building of a cement storage cellar for vegetables, replacing of obsolete bedding and furniture in the inmates' rooms, painting of all the buildings, etc.

The inventory of live stock, farming implements, wagons, harnesses, hay, household furniture, etc., filed with the City Treasurer shows an increase during the past year of about 28½%.

I have filed with the City Treasurer an inventory of live stock, farming implements, wagons, harnesses, hay, household furniture, etc., amounting to \$4,448.27.

Respectfully submitted,

FRANK W. DIGNAN.

Report of Inspector of Buildings

To the Honorable City Council:

Gentlemen:

I herewith submit the following report for the year ending December 31, 1928:

Houses	100
Additions to houses	16
Barns and garages changed to houses	8
Make changes in and build additions to houses for store purposes	3
Repair and remodel houses	5
Repair and enlarge porches	2
Porches	25
Churches	1
Private garages	117
Additions to private garages	8
Barns sheds, etc., changed to private garages	5
Public garages	2
Additions to public garages	2
Store buildings	4
Additions to, repair and remodel business blocks	10
Barber shops	1
Paint shops	1
Tool houses	1
Additions to shops	2
Storehouses	4
Place storage tanks	1
Filling stations	1
Dry kilns	1
Additions to greenhouses	1
Erect dining cars	2
Kitchens to dining cars	1
Additions to roadside stands	2
Temporary buildings and stands	4
Camps	1
Poultry houses and repair poultry houses	7
Sheds and additions to sheds and barns	5
Move buildings	24

Respectfully submitted,

CHARLES G. NOYES,

Inspector of Buildings.

Report of District Nurse

To the Honorable City Council:

I hereby submit the following report as District Nurse for the year ending December 31st., 1928:

Whole number of nursing visits, 1707; cared for 37 maternity cases; made 63 prenatal calls; furnished medicines and clothing in 113 families and made 152 Welfare visits.

Gifts of clothing; layettes; money; fruit and vegetables were given by Church Groups, Lodges and individuals, which very materially helped in the families where there was sickness and unemployment.

The expenses of the year for salary; transportation and supplies, were \$1,340.00; received from patients' fees, \$434.00.

Respectfully submitted,

LUCIE P. CLARK,

District Nurse.

Report of Health Officer

CITY OF RUTLAND

Year of 1928

Cases Reported:

Whooping Cough	51
Chicken Pox	97
Measles	11
Mumps	16
Diphtheria	4
Scarlet Fever	9
Typhoid Fever	17
Pneumonia	8
Erysipelas	3
Influenza	3
German Measles	2

Total 221

Plumbing Inspections 34

WATER—A sample of the City Water has been sent daily, except Sunday, to the Laboratory at Burlington for examination, and has been reported in good condition.

MILK—The milk has improved greatly during the past two or three years. I have sent 86 samples of milk to the Laboratory this year for examination, and out of this number the returns report only five show "A slight amount of visible dirt." This is a high standard to attain and the farmers should feel proud of the milk they furnish the City.

Respectfully submitted,

GEO. RUSTEDT, M. D.
Health Officer.

Report of Department of Public Health

Statistics for 1928 compiled from certificates filed in the City Clerk's office.

Report of City Weigher

To the Honorable City Council:

I respectfully submit the following statement of weighing done on the City scale during the year 1928.

Paid the City Treasurer for 1,329 weights	\$139 20
Weighing fees	69 60
Net	\$69 60
Number of loads of coal, etc., weighed for the school buildings and City Hall free of charge	90
Total number of weights	1,419

Respectfully submitted,

H. B. WHITTIER,
City Weigher.

Report of Librarian

The forty-third annual report of the Rutland Free Library, for the year ending January 1st, 1929:

Report of Board of School Commissioners

*To the Mayor, Board of Aldermen and Citizens of the City of
Rutland:*

The Board of School Commissioners herewith submits its report for the fiscal year ending December 31, 1928:

In a year which has been marked by great progress in the development of better school facilities for the city of Rutland it is difficult to pick out the most salient features to be reported upon as each matter by itself has been most important. However, the major features might be classed as follows: The change in housing of the High School and Intermediate School, the near completion of the new High School Building, the changes and alterations to the Meldon School, purchase of the Dana School Playground, development of the Athletic Field at the new High School, and the problem of securing an adequate teaching force under the present salary schedule in vogue for High School teachers.

For many years past, the annual reports of the Board of School Commissioners have started out with a tale of woe in regard to the crowded conditions in our High School and a plea for better housing facilities. This year we are pleased to come to the citizens with the report that, in all probability before this report is published the High School will have been established in the new High School Building. It is planned to issue a report in regard to this new building at a later date, so we will not go into details at this time.

In our 1928 report we set forth the plans and proposals in reference to the changes and alterations in the High School building and we are glad to state that most of these alterations have been completed. This building is now arranged and equipped to care for the needs of the Intermediate School for some time, and is caring for the seventh and eighth grades of our school system.

It was unfortunate that we should have been led to believe that the new building would be ready for occupancy by October 1, 1928, and that we should have made the alterations to the old building during the summer of 1928. Had we been correctly informed we could have continued the school sessions for the High School and Intermediate School as they had been for the past six years, and made the alterations during the summer of 1929. The plan for school sessions, which was adopted, was the best that could be devised under the existing conditions, but undoubtedly it has worked a hardship on scholars and teachers, especially in the science departments of the High School. However, it is hoped that the work in those departments will be made up after the occupancy in the new school is attained.

We are glad to report that the improvements and alterations at the Meldon School were effected without any additional tax or bond issue, the work having been carried on over a two year period, commencing in 1927. A detailed report of the expenditures for this work, while not intending to be complete and accurate in every detail, is as follows:

C. G. Noyes, contract	\$12,221 00
Radio Electric, contract	1,259 00
R. H. Murray, contract	560 84
A. S. Reed, contract	150 00
W. W. Ward & Son, contract	1,437 00
McKirryher & Granger, contract	839 00
Fixtures and material	1,137 70
Extras	877 59
Inspection service	100 00
Furniture and equipment	2,323 24
Boilers and minor repairs	495 73
	<hr/>
	\$21,401 10

These repairs to the Meldon School constituted the major repair work done to the school buildings during 1928, so that

nothing was done to the other buildings except to keep them in general repair.

With the addition of the New High School Building to our system, it became very evident that a new name must be given to the "Old High School Building," as it was becoming popularly known. It had been the custom to name the buildings after prominent persons or well known local educators. After much discussion, the suggestion was made by William A. Sargent, principal of the Intermediate School, that the school be named the "Meldon School," after Miss Eleanor Meldon, now a member of the teaching staff of the High School, and who has been connected with education in our town and city for the past fifty years. Miss Meldon's name first appears in the reports of our schools in the "Catalogue of the Rutland Graded Schools for the School Year ending June 27, 1879," and her first assignment was that of the Green St. Primary School. She has been a devoted, conscientious and efficient teacher, and is without a peer in the field of secondary schools. The Board felt that she had justly earned the honor, and took great pleasure in naming the old high school building "The Meldon School," the building where she had spent the greater part of her years of teaching.

In December, 1927, we estimated our expenditures for the fiscal year of 1928 at \$181,890.00. Actual expenditures for the year were \$179,679.60 but the sum of \$7,569.68 in deferred payments on teachers' salaries should be added to determine the school costs of \$187,249.28. We have a balance left in the hands of the City Treasurer to our credit of \$4,028.20, in addition to the sum kept on hand for deferred payments on teachers' salaries. We estimate the expenditures for 1929 to be \$186,250.

The budget for 1929 calls for no unusual expenditures aside from the improvement of new grounds which includes the development of the athletic field at the High School. In regard to this project, we are fortunate in having one of the Service Clubs of the city taking an active interest in the project and we hope that, with what the Board is able to appro-

priate, and what may be raised from some other source, that an athletic field worthy of the new building may be developed. The item of salaries for teachers contemplates the usual increases according to the salary schedules; the employment of three additional teachers to take up the estimated increased enrollment; and increases for special teachers.

The employment of teachers, like dealings in other commodities, is governed more or less by supply and demand. Hitherto, our public school system has been especially fortunate in securing a grade of teachers of a high type of ability for the salaries which we are able to offer under our existing schedules. However, the time is fast approaching when we shall either have to raise our maximum salaries, or fail to compete with other cities which are paying higher salaries than we.

With the completion of the new high school building, we are faced with the problem of providing adequate insurance to cover possible damage by fire. Several different views have been expressed, varying all the way from no insurance at all, to a full coverage. The citizens may rest assured that whatever decision is finally arrived at, it will be according to the best judgment of the Board and with the best interests of the citizens at heart.

For the past few years the Board of School Commissioners has been encouraging the use of the school buildings for educational and civic meetings. With an auditorium and gymnasium in the new building, a completely renovated auditorium in the Meldon Building, and conveniences in all the other buildings, it has been estimated that the buildings may be in demand for meetings of one kind or another, in the future. For the protection of the city and the preservation of the school property, the Board has thought it advisable to adopt a contract or agreement for the use of the buildings, and that the persons using the same shall be governed by a set of regulations designed, not to restrict their use, but to fix the responsibility on those who do use them.

We feel that at the present time the citizens of Rutland have the best school system in its history. There are proper accommodations for all the students, a fine body of teachers, a well organized and directed executive department, and a school plant in good repair. Since education is the foundation of all progress, it behooves everyone to keep himself informed on school matters and support the present program of school improvement in force in this city.

The Board is appreciative of the support it has been given in the past, and looks forward to the same support in the future.

Respectfully submitted,

BOARD OF SCHOOL COMMISSIONERS,

By George N. Harman, President

Rutland, Vermont, February 4, 1929

Report of the Superintendent of Schools

To the Board of School Commissioners, the Mayor, the Board of Aldermen and the Citizens of the City of Rutland:

I have the honor of submitting to you the thirty-sixth annual report of the Rutland Public Schools and the eighth under the present administration.

In a growing school system located in a progressive community there are bound to be many adjustments of schedules, pupil assignments and other modifications of procedure. For evident reasons the present year presents more of these changes than ordinarily come to a settlement in a much longer period of time.

ORGANIZATION AND ASSIGNMENT OF PUPILS

The erection of a new building for the high school made a partial redistribution of pupils necessary and advisable. After much consideration the Board of School Commissioners decided to adopt the 6-2-4 plan of organization for the Public Schools of Rutland which means seven elementary schools with grades one to six, or as many of these grades as the capacity of the building will permit, one intermediate school for all the pupils of the city in grades seven and eight and a high school for grades nine to twelve. The assignment by buildings and grades is as follows:

Dana School on East Center Street	Grades 1 to 6
Kingsley School on Pine Street	Grades 1 to 4
Lincoln School on Lincoln Avenue	Grades 1 to 6
Longfellow School on Church Street	Grades 1, 5 and 6 and two special classes
Madison School on Madison Street	Grades 1 to 4
Park School on Park Street	Grades 1 to 6
Watkins School on Watkins Avenue	Grades 1 to 6
Meldon School on Center Street	Grades 7 and 8
Rutland High School on Library Avenue	Grades 9 to 12

LENGTH OF THE SCHOOL DAY

The number of hours children spend at formal school work depends on a number of factors and is difficult to determine in any dogmatic fashion. The time schedule, 9:00 A. M. to 12:00 M. and 1:30 P. M. to 3:30 P. M. in use in grades one to six for many years, seems to be well adapted to these children.

On account of the departmental organization and extra curricular activities at the Intermediate School and High School there has been a feeling that a modified time schedule would be desirable. Experience seems to indicate that it is best to have four periods of about fifty minutes each in the morning and two periods of about fifty-five minutes each in the afternoon making the daily schedule for these schools 8:30 A. M. to 12:00 M., and 1:15 P. M. to 3:15 P. M. This schedule will work a little hardship because of a reduction in the amount of time for the noon recess but it is believed that its many advantages will more than offset the one disadvantage. The long periods provided for the two upper schools will enable the teacher to manage affairs so that she will have time for the usual recitation formalities and, more important, time for the pupils to start the preparation of the lesson of the next day while the explanation is fresh in mind. This plan will tend to insure more effective work on the part of the pupils and therefore yield a more satisfactory return on the effort invested.

GENERAL ATTITUDE TOWARD SCHOOL

While school people are working to improve the subject matter offered, to adjust the time schedule to meet present conditions and to present the offerings of the school in an attractive and palatable form there is a tendency on the part of many of our pupils so to arrange their own affairs that the efforts of the school are seriously curtailed.

Indifference to tardiness and absence in the upper grades is a menace to orderly school progress when one considers that the habits and attitudes established in these early years are of infinitely more importance than any facts we may teach.

It is difficult to distribute the responsibility for this most undesirable situation. No one would advocate that any child ought to attend school if he is not in fit physical condition. Worthy organizations without realizing fully the consequences frequently disrupt our upper schools by inviting large numbers of pupils to participate in activities which have no connection with schools. I do not wish to belittle the social value of such enterprises but school is the major business of the young people of this city and they have no more right to neglect their major business than a doctor or a banker or a merchant has to neglect his. Failure is the only result we can anticipate from such neglect. This matter merits the serious consideration of all who place the fundamental training of youth above that which is trivial and of slight intrinsic worth. I acknowledge that during the present year it has been unusually difficult to maintain a high average of attendance and punctuality but I believe our young people might make greater personal effort when the service of the school is limited by a lack of equipment or time. Moreover if the investment made in education is to be productive parents must find some way to drive with a little tighter rein.

IMPROVEMENT OF SERVICE

The school administrator must ever be alert to determine changes in procedure and personnel and to know when new services may be added. The present is a year of transition from crowded quarters and part time to commodious quarters and full time. It is not surprising, therefore, that the Board of School Commissioners should regard this as a proper occasion for the authorization of certain improvements in the service offered the children of the city and have added to the teaching force a Director of Physical Education, a Supervisor of Handwriting, who is also a home visiting teacher, and an instructor of Manual Training. Because curtailment and consolidation was possible in other departments we have been able to add teachers for these fields with an increase of but one to our staff.

Some time must elapse before the full results of improved methods in handwriting instruction can be seen but evidence is not lacking which shows marked improvement in skill and enthusiasm. The supervisor of handwriting, Miss Margaret Hoyt, puts the case in this way.

"A penmanship expert says, 'The purpose of handwriting instruction in the grades should be to equip **all** pupils, in the shortest time possible, with a style of writing that possesses a high degree of legibility and is written with a reasonable degree of fluency.' Such has been the goal toward which we have been working in our penmanship. We have striven for legible letter forms, asking the child to acquire these with a reasonable degree of arm rather than finger movement that he may thus acquire that reasonable degree of fluency which is desired. The teachers have approached the work in a most enthusiastic manner and because of the excellence of their work we have made decided progress toward our objective."

MANUAL TRAINING

About two years ago I was asked to appear before a club of trained engineers to explain why it was that manual training was not offered in the Public Schools of Rutland. The attitude of this group is typical for all who understand the value of hand work in developing manual skill and a fine appreciation of fundamental values. Care and use of all wood working tools, persistence in carrying to completion a task once begun, definite training which may lead to an occupation or a life interest and the development of original ideas are important results to be expected in this department.

The manual dexterity developed during school days may help to discover a skilled surgeon or lead to better citizenship because of increased ability to provide and maintain a home.

PHYSICAL EDUCATION

The importance of Physical Education is not likely to be overlooked after all the evidence of its value has been considered. As a matter of economy a school system is bound to

give close attention to the health of children because if they are absent from school any considerable length of time they must repeat the grade which means added expense. Our health work has been in operation so long and has been so efficiently managed by our school nurse, Miss Mary A. Devlin, that its value is accepted without question. Few realize, however, the full extent and importance of this service which not only brings physical defects of children to the attention of the careful parent but in many cases takes steps to correct the defect. Moreover, a number of underprivileged children with serious physical handicaps receive hospital care which would be impossible without the efforts of the school nurse. Thirty such cases ranging from removal of tonsils to an orthopedic operation have been treated this year.

The influence and value of supervised play and recreation under the direction of Mr. Richard F. Hayden is already apparent. I expect to see marked improvement in the physical condition of our school children as the work progresses. Mr. Hayden presents the needs and purpose of his department.

"The period of childhood and youth is the period of growth in all bodily structures. In order to insure satisfactory growth during this period, a large amount of vigorous physical exercise is necessary.

"This may only be brought about by organization and administration of the equipment at hand and the cooperation of the teaching force in our public schools. The schools are in need of adequate play space and facilities and this may be worked out only through a wisely planned program.

"A forward step has been taken in providing a gymnasium and athletic field for the high school. On this tract of land should be developed several tennis courts, baseball and football fields with adequate accommodations for spectators and players. How may this be carried on to better advantage than through a five year building program?

"Graded gymnastics, games, folks dances and athletics constitute our program in attaining the following results:

1. Prevention and correction of physical defects through examination and education along health lines.
2. Contribute towards the all-around development of boys and girls physically, mentally and morally, through a balanced physical education program.
3. To arouse interest in and to establish habits of physical recreation that will serve the immediate need and to 'carry over' to adult life."

It is pleasant indeed to contemplate the school situation in Rutland today. During the past eight years no major policy or recommendation of the present administration has been denied because of a lack of financial support or popular approval. The erection of a new high school building has been delayed but who will deny that the beautiful and useful structure we now have located on a site which is suitable in every way for school purposes makes the delay seem trivial and justifies the prudence of those who were slow to be convinced.

We have been able each year to add to the tools of instruction so that the teacher has become more efficient and the children surer of success. Our teachers are diligent in professional growth and zealous in their efforts to arrive at a better understanding of child needs.

Success is assured for a school system which has a body of loyal and efficient teachers and a high degree of public support.

Respectfully submitted,

W. W. FAIRCHILD,

Superintendent.

Rutland, Vermont, February 6, 1929.

Pratt, M. H.....	High.....	107 Library.....	1,350 00	1928

†Deceased.

Report of Auditors

To the Honorable City Council:

Your auditors have audited the books of the City Treasurer, City Clerk, Overseer of the Poor, Superintendent of Schools, and Sinking Fund Commissioners from January 1, 1928, to December 31, 1928, inclusive, and we hereby certify that, in our opinion, they have duly accounted for all monies received by them and that they have proper vouchers for all monies expended.

We find the records of disbursements as shown by the City Clerk and Superintendent of Schools in agreement with the entries on the books of the City Treasurer. We have checked the cash and verified the bonds, deposit books and securities in the hands of the City Treasurer and Sinking Fund Commissioners, and found them to be correct.

The books and records of the City Treasurer's office are in their usual excellent condition and very clearly show the city's true financial condition on December 31, 1928; and the result of operations for the twelve months' period then ended.

Respectfully submitted,

EARLE T. TOWER,
GEO. A. SABIN,
JOHN W. BURKE,
City Auditors.
